WORK EXPERIENCE

SCASE LTD, Syria — *C++ Developer*

NOV 2023 - PRESENT

Subsidiary of Intenta GmbH, develops smart sensors and car driving assistants.

- **Refactoring 6+ key components, improving code efficiency by 30%**
- **Collaborating with multi-functional teams to optimize car localization algorithms**, **boosting availability by 25%** and ensuring continuous service for end-users.
- **Generating automated testing for 8 critical features**, resulting in improved feature stability

EDUCATION

Tishreen University, Bachelor in Information Technology 🔗

JAN 2018 - NOV 2023
GPA: 80.65, Top 10% of my class.

Relevant Coursework:

- Data Structures and Algorithms
- Database Management Systems
- Object Oriented Programming
- Software Engineering
- Design Patterns
- Artificial Intelligence

Master of Web Science, Syria Virtual University

JAN 2023 - PRESENT

This program offers advanced expertise in web technologies and internet systems, covering topics like web development, data mining, analysis, security, and cloud computing

PROJECTS

E-Store 🔗

Developed a comprehensive online store application designed to support multiple product categories and ensure secure transactions.

Stack: PHP, Laravel, MySQL, Vue.js, Vuex, Tailwind CSS.

SKILLS

Proficient
PHP, Laravel, MySQL, REST API, PHPUnit, JavaScript, Vue.js, Vuex, Git, OOP, Tailwind CSS, C++, Problem Solving, Agile, JIRA, Teamwork, Quick-Learner, Diligence

Familiar
React, Docker, Design Pattern

LANGUAGES

English B1, intermediate
German A1, beginner
Arabic native

ACCOMPLISHMENTS

Successfully solved over 400 advanced coding challenges on platforms like Codeforces and LeetCode, covering diverse topics such as graph theory, dynamic programming, and others.

- **Implemented a responsive UI for seamless navigation** and a streamlined checkout process.
- Integrated a robust product management system, allowing owners to efficiently add, update, and organize products, Additionally, **created a Laravel package (Treeify) to streamline and simplify data handling processes.**
- **Empowered owners with interactive charts** to improve data understanding, and **utilized WebSockets to provide real-time updates on recent events**.
- **Perform secure payment processing** and user authentication, ensuring a safe environment for transactions.
- **Deployed with Docker**, ensuring seamless deployment and scalability across different environments.

Survey Time 🔗

Web application for creating surveys and sharing them with others to gather their responses.

Stack: PHP, Laravel, MySQL, Vue.js, Vuex, Tailwind CSS.

- **Designed an intuitive interface for easy survey creation and management, allowing customizable question types.**
- **Established live-updating dashboard**, ensuring users stay informed about new events.

ZIP URL 🔗

PHP-MVC project aimed at creating and managing short URLs, leveraging the Model-View-Controller (MVC) architectural pattern.

Stack: PHP, MySQL, Bootstrap.

- **Fulfilled a robust routing system,** efficiently mapping incoming requests to controllers, enhancing navigation speed and improving URL handling**.**
- **Built authentication and authorization functionality** to restrict URL creation and management to authorized users.
- **Employing token-based CSRF protection** and **preventing session hijacking.**
